The lab work for the course will consist of the Hands-On assignments at the end of each chapter in the textbook. These will be broken up into 3 sections:
- Chapters 1 – 6 will be due at the end of week 3
- Chapters 7 – 10 will be due at the end of week 5
- Chapters 11 – 14 will be due at the end of week 7

These labs can be run against the student's database in the Citrix environment, or on a home machine against a local Oracle database. For more information about the submissions that are expected from the labs, see the posts put into the "Facilitator Notes" section in the online course.
